Actuarial Internship

Start Your Career Before You Graduate

Start Your Career Before You Graduate

The BerkleyMed Actuarial Internship Program is designed to be an enriching experience for both our interns and actuarial staff. Our interns function as valuable members of our team and are integral to our actuarial processes. The projects assigned to our interns offer the best opportunities to combine formal academic training with actuarial science in practice so you can start your career before you graduate.

As a BerkleyMed Actuarial Intern you will learn:

- How data for the medical malpractice field is captured, evaluated, and directly implemented in our pricing model and benchmarking database,
- Microsoft Excel, Visual Basic, and SQL applications to capture and analyze insurance data in real world scenarios,
- How actuaries interact with the various disciplines found within an insurance company, and
- What it really means to be an actuary in the property-casualty line of business.

Program Eligibility

We are looking for actuarial interns that have:

- A desire to be part of a creative and innovative team that is striving to become a leader in the excess medical malpractice industry,
- A willingness to learn new skills and to seek ways to apply those skills to assist the BerkleyMed team in achieving their goals and objectives,
- The ability to work well alone, as well as under the supervision of our experienced actuarial team, and
- Basic knowledge of Microsoft Excel and an interest in learning Visual Basic and SQL.

Completion of actuarial exams is a plus, but not the deciding factor in who is ultimately invited to join the BerkleyMed Actuarial Internship Program. Dedication, reliability, and a good work ethic are the key elements we look for in our intern candidates.

Actuarial Internship Structure

Participants in the BerkleyMed Actuarial Internship Program have the opportunity for advancement through demonstration of their abilities and commitment to BerkleyMed. Promotion comes with additional opportunities to participate in projects involving SQL, VBA, and SAS, as well as develop leadership skills through mentoring fellow interns.

Are you ready to apply?

Minimize Risks, Maximize the Returns, Become a BerkleyMed Intern

I was brought into BerkleyMed as an Actuarial Intern half way through my sophomore year at Maryville University. My experience was fantastic, and I couldn't have found a better place to have been introduced to the actuarial field.

Paul G.
Towers Watson Actuarial Analyst,
Maryville University Class of 2010

BerkleyMed provided me with the opportunity to work in an interesting line of business with unique actuarial challenges, learn the technical skills needed to succeed as an actuary, and understand how actuaries work with other disciplines to meet the company's business objectives.

Adam B.
BerkleyMed Marketing Analyst,
Maryville University Class of 2008

My internship at BerkleyMed has been a great experience because not only have I had the opportunity to get exposure to a broad range of actuarial challenges, but I've been able to do so in collaboration with an amazing group of highly skilled and highly motivated professionals in an environment which fosters learning.

BerkleyMed Actuarial Intern II, Maryville University
Maryville University Class of 2013

Actuarial Internship Program

About BerkleyMed

BerkleyMed was formed in 2002 and operates as a separate company under the Alternative Markets Segment of the W.R. Berkley Group. Our focus is exclusively on hospitals and healthcare organizations that have elected to self insure their professional liability risks and seek to maximize the effectiveness and efficiency of that risk financing program. We manage direct excess and umbrella coverage, over a trust or other self-insurance vehicle, and reinsurance to captive facilities and provide value to our brokers and clients by collaborating on Risk Management, Claims Management, and financial issues.

Our Mission

BerkleyMed seeks to be the market leader in medical malpractice excess and reinsurance coverage by providing customized risk financing alternatives and risk mitigation services that meet the unique needs of our healthcare clients and assist them in reducing Total Cost of Risk.

Our Experience

The BerkleyMed team includes specialists from all facets of the insurance industry, including Finance, Actuarial, Clinical Risk Management, Underwriting, and Claims Management. This multi-disciplinary team works collaboratively to enhance our ability to act as a resource to our insureds and brokers. In working together, we can better understand their strategic objectives and deploy our products and resources to support their operational and risk financing objectives.
